## REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a digital imaging method and system. The closest prior art, Hubel et al. (USPN 6,038,339), shows a similar system, in which, color digital imaging quality is improved by quickly, accurately and robustly estimating illuminant information associated with a color digital image to correct color of the image based on the illuminant, wherein a correlation matrix memory or associative matrix memory is used to achieve identical results to the color in perspective method and to improve it by adding Bayesian or other correlation statistics. However, Hubel et al. fail to address: "for wherein a color image database storing multiple images from actual image data and an image processing process that is capable of detecting color and illuminants of the acquired digital images based on color and illuminants of the multiple images from actual image data stored in the color image database". These distinct features have been added to all independent claims and render them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
